Traffic Management Highlights

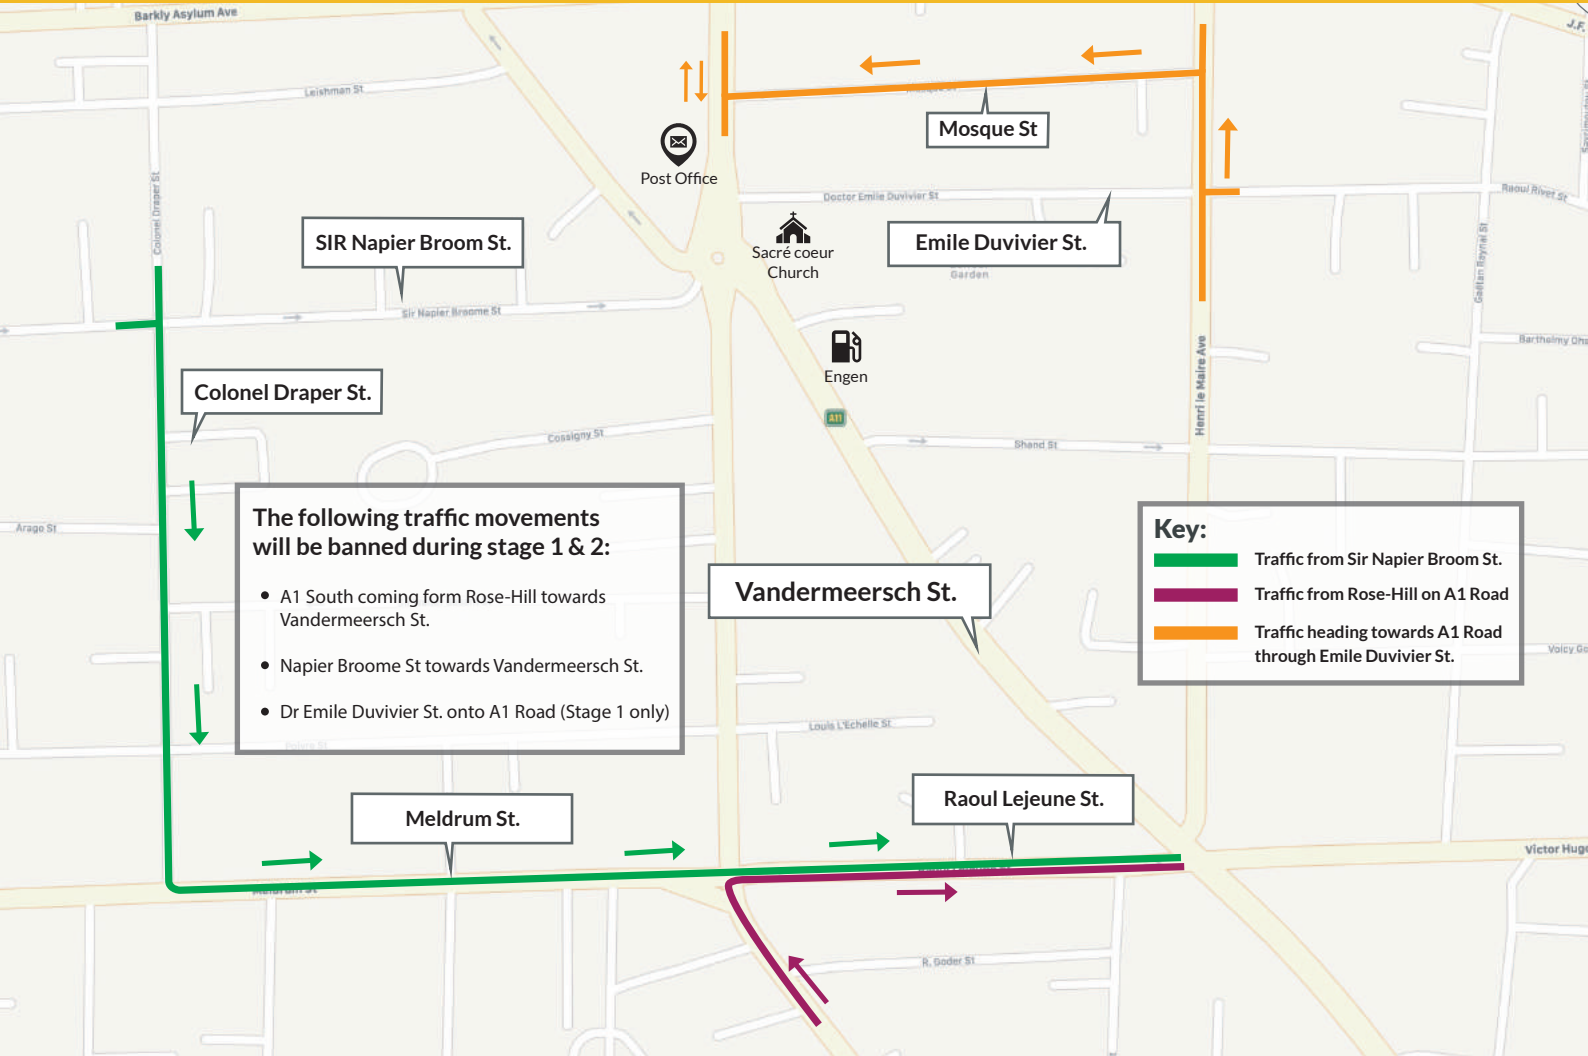

To limit inconveniences for the traffic flow, road users and general public, the new traffic scheme and configuration will be implemented in different phases

- Work with regards to the Metro Express Project will be carried at the intersection of Vandermeersch Street, Port Louis - St Jean Road and Sir Napier Broome Street (Beau Bassin Roundabout) as from 25th May 2019 and for a period of 12 weeks.
- The existing road configuration at the roundabout will be modified to allow for the safe execution of the works. The roundabout will be converted into a junction and all traffic movements will be allowed except the following which will be diverted accordingly:
 - Traffic along Port Louis St Jean Road from Rose Hill heading towards Vandermeersch will be diverted towards Raoul Lejeune Street to join Vandermeersch Street
 - Traffic heading towards Vandermeersch Street through Sir Napier Broome Street will be diverted along Colonel Drapper Street, Meldrum Street and Raoul Lejeune Street to join Vandermeersch Street.
 - Traffic heading towards Port Louis St Jean Road (A1) through Emile Duvivier Street will be diverted along Henri Lemaire Street and Mosque Road to join A1.

The necessary traffic signs will be set up to inform and guide road users

Drivers are strongly advised to exercise caution when approaching the works area and to drive within the prevailing speed limit. Traffic will be controlled by the Police during rush hours

Permanent diversion throughout execution of works

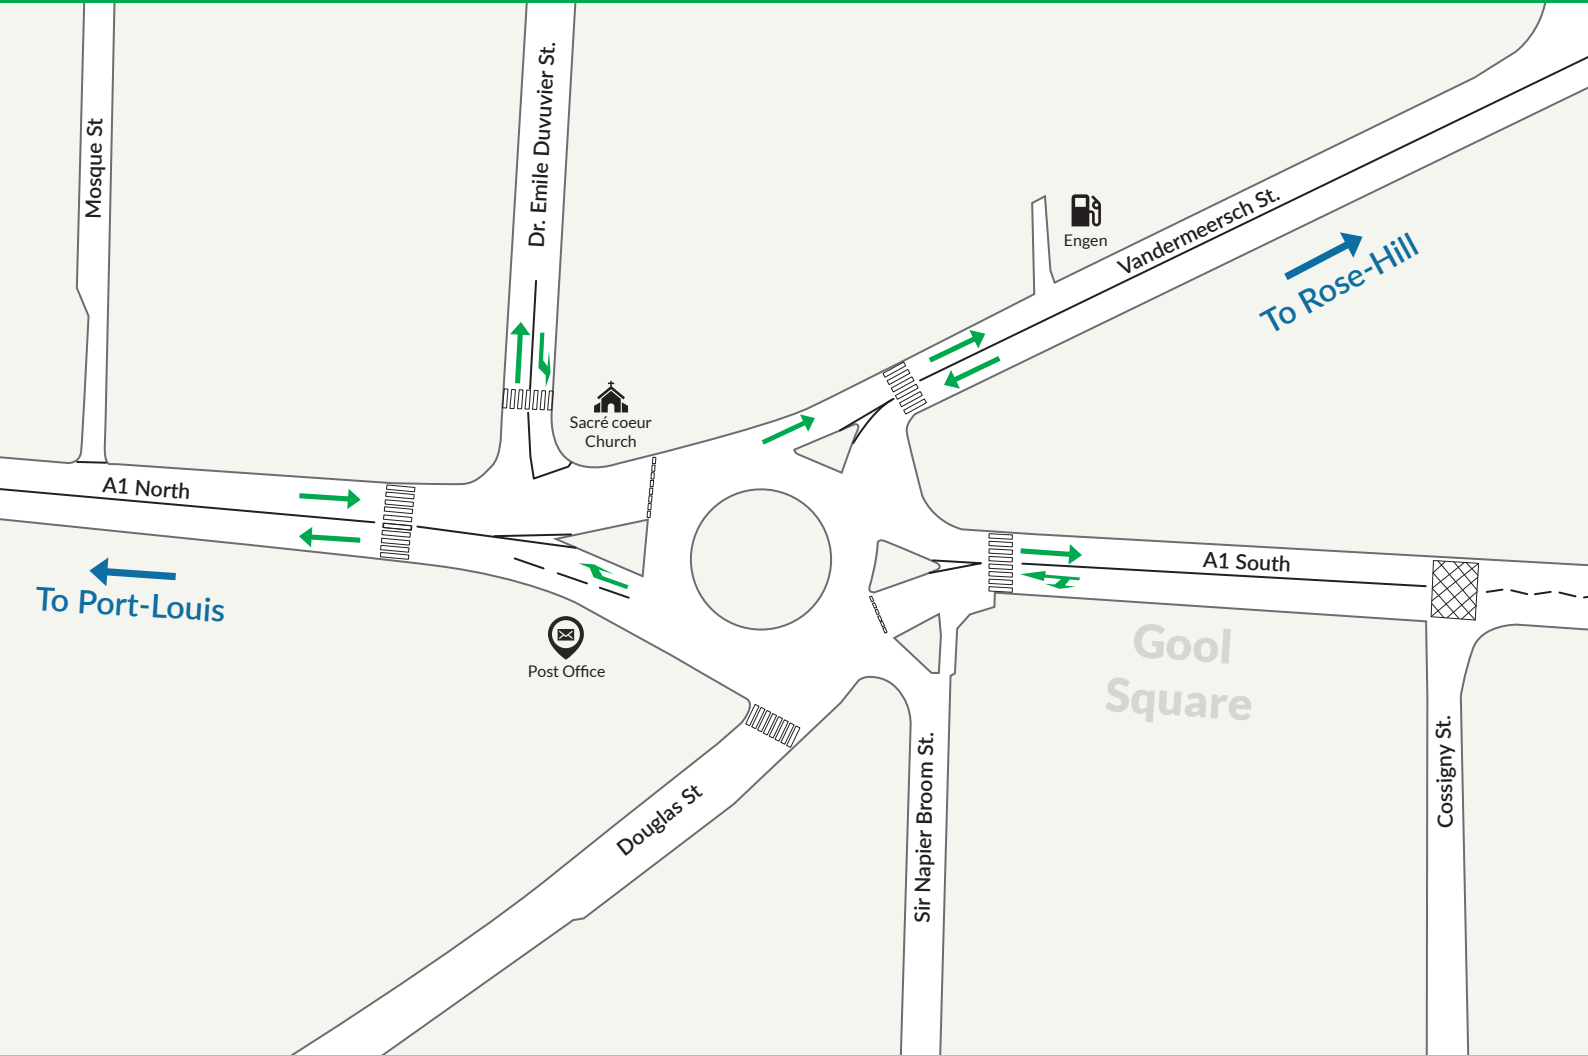

The following traffic movements will be banned during stage 1 & 2:

- A1 South coming from Rose-Hill towards Vandermeersch St.
- Napier Broome St towards Vandermeersch St.
- Dr Emile Duvivier St. onto A1 Road (Stage 1 only)

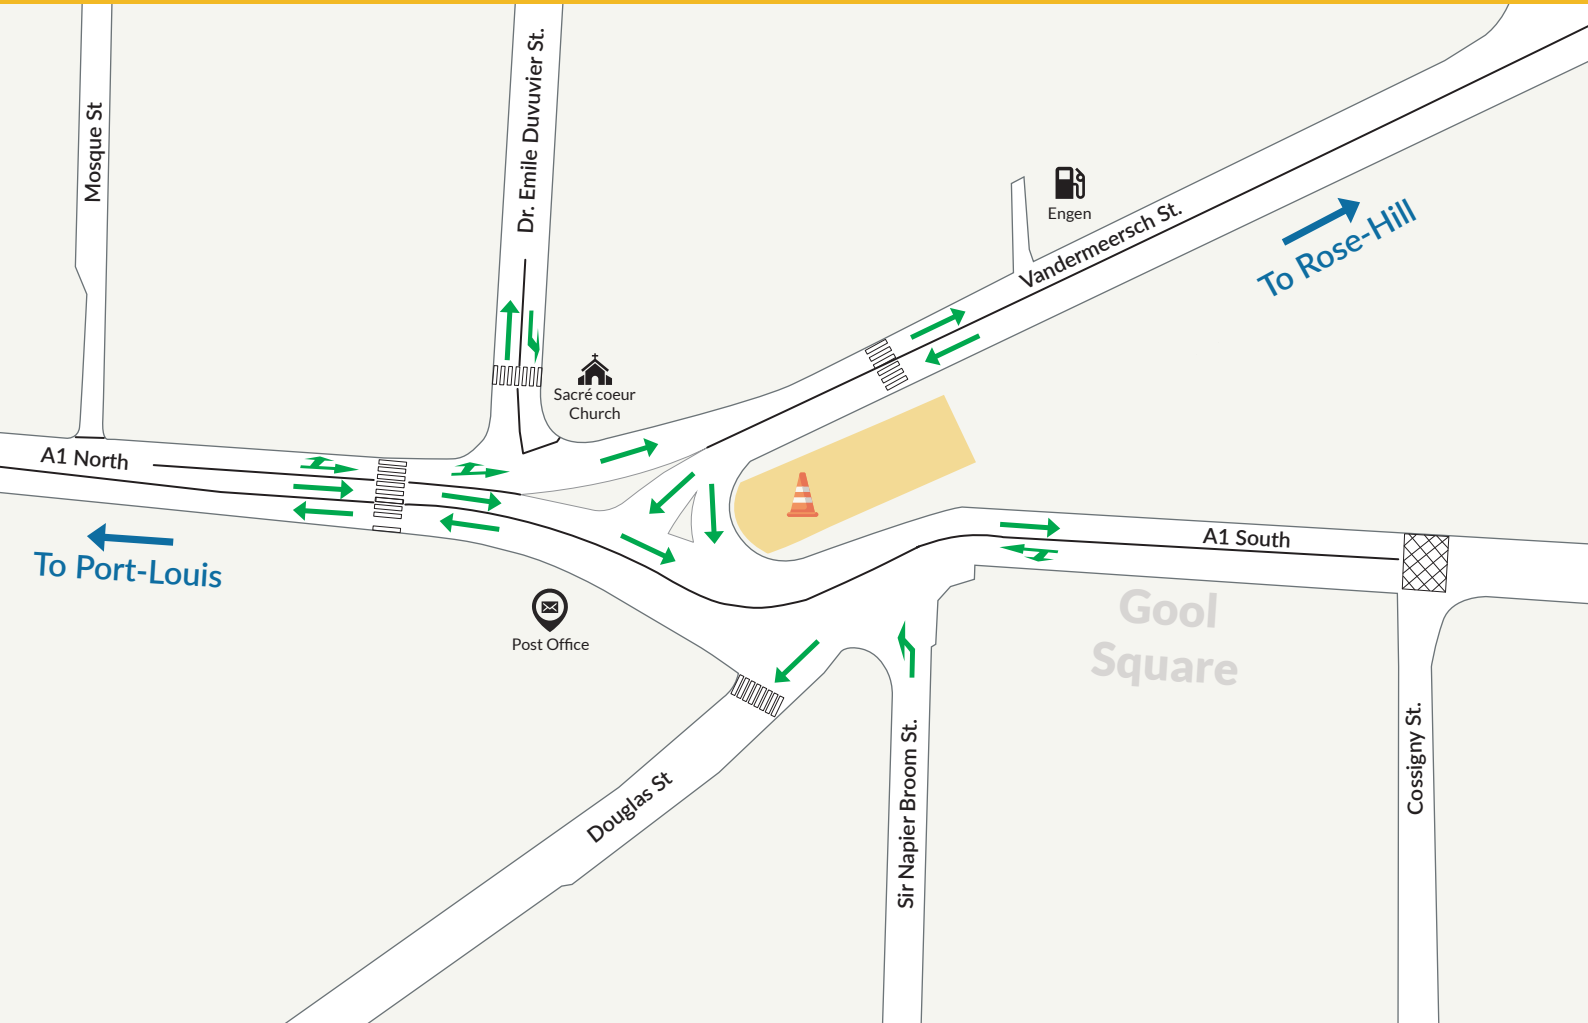

Key:

- █ Traffic from Sir Napier Broom St.
- █ Traffic from Rose-Hill on A1 Road
- █ Traffic heading towards A1 Road through Emile Duvivier St.

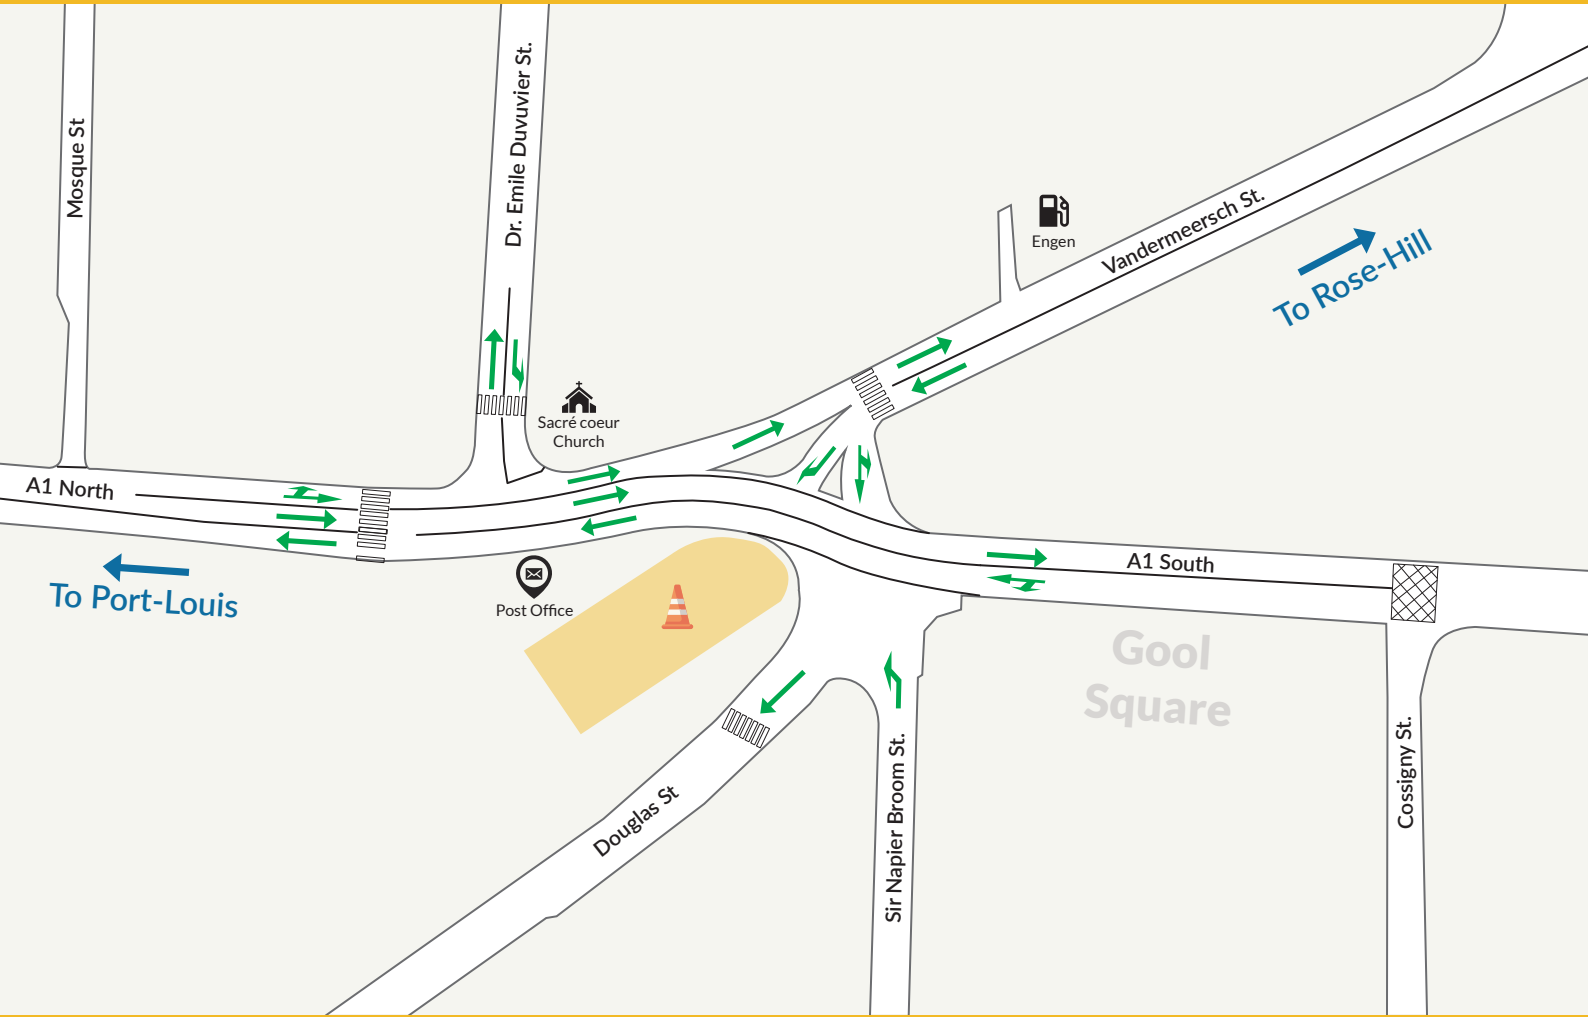

Existing configuration - Beau-Bassin roundabout

Stage 1: The roundabout will be converted into a junction to allow for the execution of works across half width of the junction

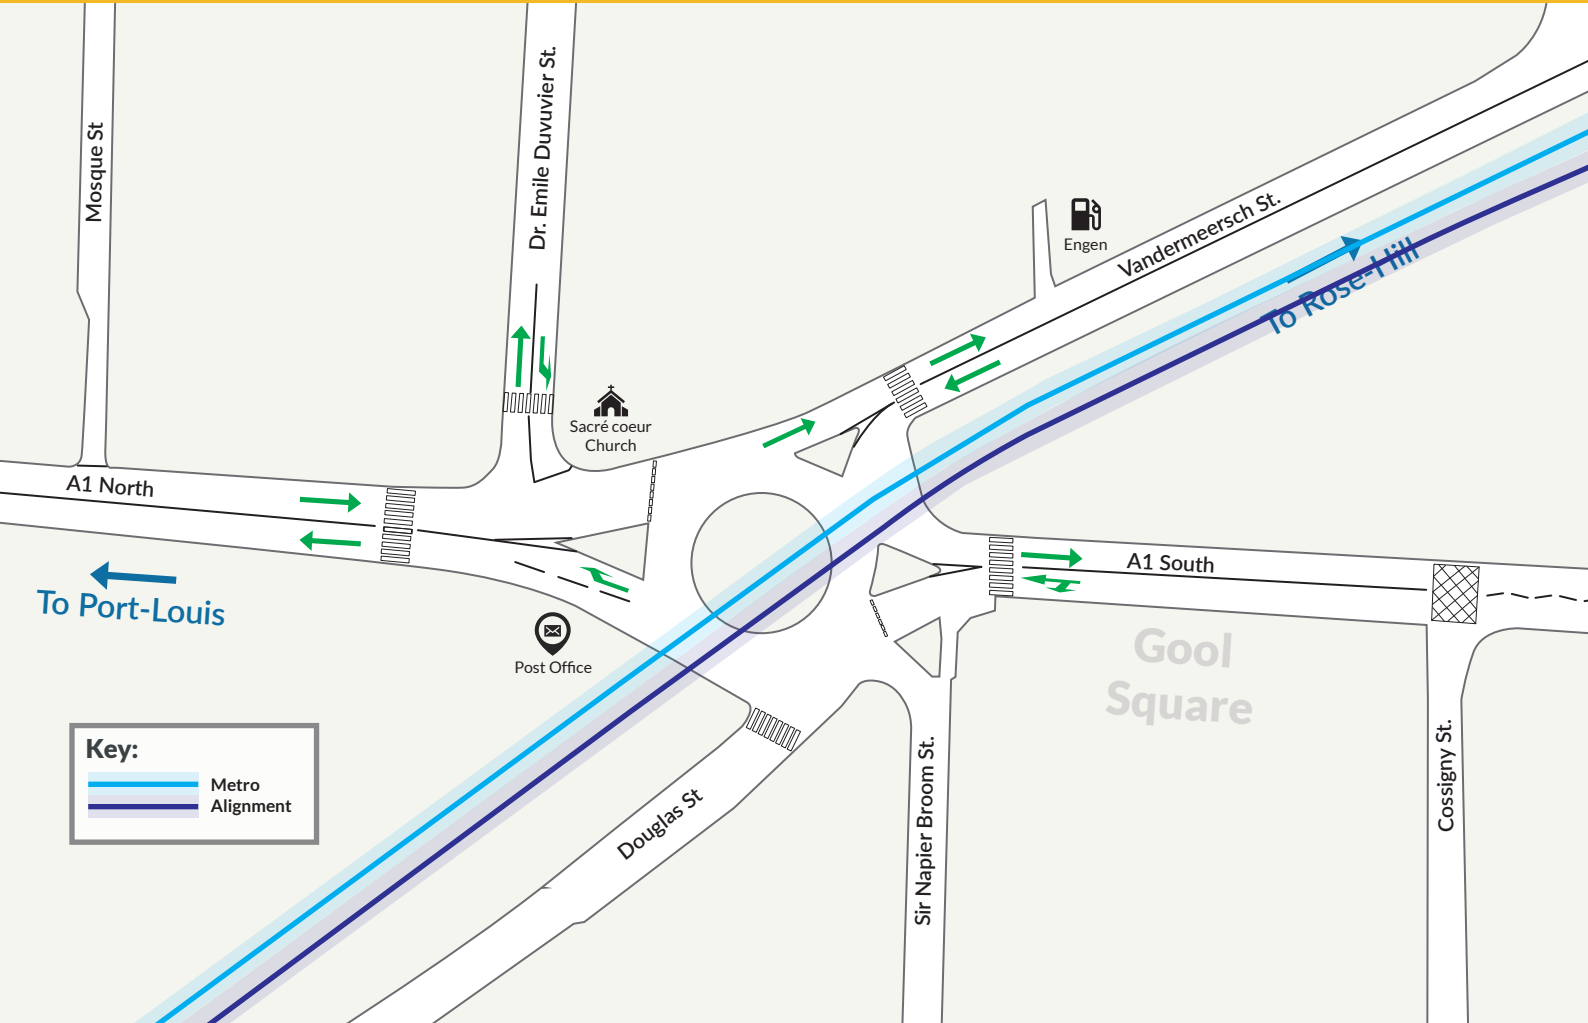

Stage 2: The geometry of the junction will be modified to allow for the execution of works in the other half of the intersection

Stage 3 : The roundabout will be reinstated (delineated with traffic cones/barriers).

All traffic movements will be restored until the next phase of works

Stage 4: The traffic signals will be set up and put into operation (with metro alignment crossing).
Construction of footpath & pedestrian refuge along with final road markings will be completed.
