

# PRESS COMMUNIQUE

27 January 2021

---

Metro Express Ltd wishes all devotees a pious **Cavadee**.

In the context of the **Cavadee** festival, MEL would like to remind all devotees and the public that the Overhead Lines are energised/live and can cause electrocution if touched (directly or indirectly with any object). We would therefore advise the public to stay away and take extra precautions while in the vicinity of the Metro Express alignment due to the high risk of electrocution which may lead to serious injury.

For your own security, please, always maintain a safe distance from our live overhead lines. If crossing the Metro Express railway corridor is unavoidable, please ensure a safe distance of at least 2 meters from any overhead electric line.

We would also kindly request you to stay away from the construction sites as far as possible. In case you need to walk near the sites, please follow all signages for proper guidance.

Police will be present to guide pilgrims as customary.

Thank you for your cooperation and understanding.

MEL Management
